## SUMMARY

Motivated Computer Science and Business Systems graduate with a solid foundation in full-stack and blockchain development. Developed an NFT creation platform leveraging IPFS and Pinata for decentralized asset storage, attaining a 97% MetaMask authentication success rate surpassing the typical 80% benchmark for comparable applications..

---

## EDUCATION

B.TECH – Computer Science and Business Systems  
KGISL Institute of Technology, Coimbatore  
August 2022 – Present  
CGPA: 7.5

Higher Secondary School (HSC)  
Bharathi Higher Secondary School, Chinna Salem  
June 2020 – March 2022  
percentage: 84

Secondary School Leaving Certificate (SSLC)  
Bharathi Higher Secondary School, Chinna Salem  
June 2009 – March 2020  
percentage:96

---

## PROJECTS:

### Blindly Brilliant – Full Stack NFT Minting Web

**Tech Stack: Node.js, Express, Ethers.js (v6), Solidity, Pinata, IPFS, HTML/CSS/JavaScript**

- Engineered and deployed a decentralized NFT minting platform tailored for visually impaired users, increasing accessibility in Web3.
- Configured file uploads to IPFS using Pinata and minted NFTs with an ERC-721 smart contract on Ethereum testnet /mainnet.
- Integrated MetaMask for wallet authentication, achieving seamless interaction with a >95% transaction success rate.

### Voting App

**Tech Stack: HTML, CSS, JavaScript, Node.js, Solidity, Ethers.js**

- Designed a secure voting app utilizing Ethereum smart contracts, enabling real-time, tamper-proof voting; reduced manual ballot counting by 90% and accelerated election result reporting by 80%.
- Separated frontend and backend logic, resulting in 35% faster load times and cleaner architecture for future scaling.
- Enabled MetaMask wallet integration for vote casting and authentication with zero duplicate votes during simulation tests.

## Library Management:

### Tech Stack: HTML, CSS, Bootstrap, JavaScript, Node.js

- Implemented a library management platform featuring secure user roles and instant data consistency, ensuring 100 users could access services simultaneously without downtime.
- Architected rolebased access control (RBAC) system, establishing secure login mechanisms and real-time database synchronization, which streamlined data access for 15 departments.
- Optimized frontend using Bootstrap and JavaScript, reducing book search time by 40%.

## ERC-20 Token Transaction System:

### Tech Stack: Solidity, Ethers.js, Node.js, HTML/CSS/JavaScript, MetaMask.

- a React-based UI incorporating Solidity smart contracts for secure token transfers via MetaMask, leading to a measurable personal achievement of 50 successful user transactions within one week.
  - Launched a full-stack decentralized application (DApp) featuring an ERC-20 token with minting and transfer functionalities; enhanced user engagement on platform by 30% through secure MetaMask transactions.
  - Implemented real-time transaction feedback using Web Sockets, providing users with instant confirmation of token transfers, leading to 15% fewer support tickets related to transaction status inquiries.
- 

## Internship 1:

- **Role:** Web Development Intern
- **Duration:** June 2023 – July 2023
- **Organization:** Cognifyz Technologies
- **Description :** Developed five responsive web pages utilizing HTML, CSS, JavaScript, and Bootstrap, resulting in a 15% faster page load speed and improved user engagement based on analytics.

## Internship 2:

- **Role:** C/C++ Developer Intern
  - **Duration:** January 2024 – March 2024
  - **Organization:** Cognifyz Technologies
  - **Description:** Developed and optimized C/C++ programs for system-level operations and basic data structures, achieving 20% faster execution in simulation tasks. Collaborated with a team of developers to debug legacy code and improve program stability.
- 

## ACHIVEMENTS:

- Paper Presentation in Anna University, Chennai [2024].
  - a smart irrigation system prototype using IoT sensors and machine learning algorithms at the Smart India Hackathon; project resulted in a 20% reduction in water usage [2023].
- 

## TECHNICAL SKILLS:

- **Programming Languages:** JavaScript, Solidity, HTML, CSS
  - **Frameworks & Libraries:** Node.js, Express.js, React (basic), Ethers.js
  - **Blockchain Tools:** Hardhat, Remix, MetaMask, Infura, Pinata, IPFS
  - **Version Control:** Git, GitHub.
  - **Other:** REST APIs, JSON, Web3.js
- 

## CERTIFICATION:

- C Program Completed Certification – Coursera, Hackerrank.
- BlockChain Completed Certification – Coursera.
- Frontend Completed Certification -Coursera.
